# Backed by a world-class organisation

Barloworld Logistics is part of the Barloworld Group recognised worldwide for offering flexible, value-adding, integrated business solutions to customers backed by leading global brands such as Caterpillar, Hyster, Avis, Audi, BMW, Ford, General Motors, Mercedes-Benz, Toyota, and others.

Founded in 1902, Barloworld now operates in 26 countries around the world. With a proven track record of long-term relationships with global principals and customers, Barloworld is equipped to develop and grow businesses in multiple geographies, including challenging territories with high growth prospects.

# Driven to deliver exceptional results

Established in 2001, Barloworld Logistics has grown into a significant supply chain solutions business in southern Africa with complimentary operations in the Middle East, Spain, Germany, the United Kingdom and the United States of America.

Combining a smart approach with innovative thinking and supply chain foresight, we design, implement, manage and operate smart supply chain solutions that grow our clients' bottom lines.

Smart Partnerships form the cornerstone of creating a competitive advantage for our clients. Not only do they enable us to create truly customised supply chain solutions, but a culture of collaboration and accountability. Through partnerships with key industry players, Barloworld Logistics has developed numerous inhouse and world-class competencies and received many industry and supplier accolades and awards.

As an international provider of smart supply chain solutions, Barloworld Logistics' focus on specific industries enables us to create depth of experience and invaluable expertise within the chosen sectors. We are then able to leverage this knowledge for the benefit of our clients.

Barloworld Logistics is not only focused on making profits and performing at our peak. We are committed to creating sustainable opportunities that benefit us individually, as a company, the communities in which we operate, and the environment.

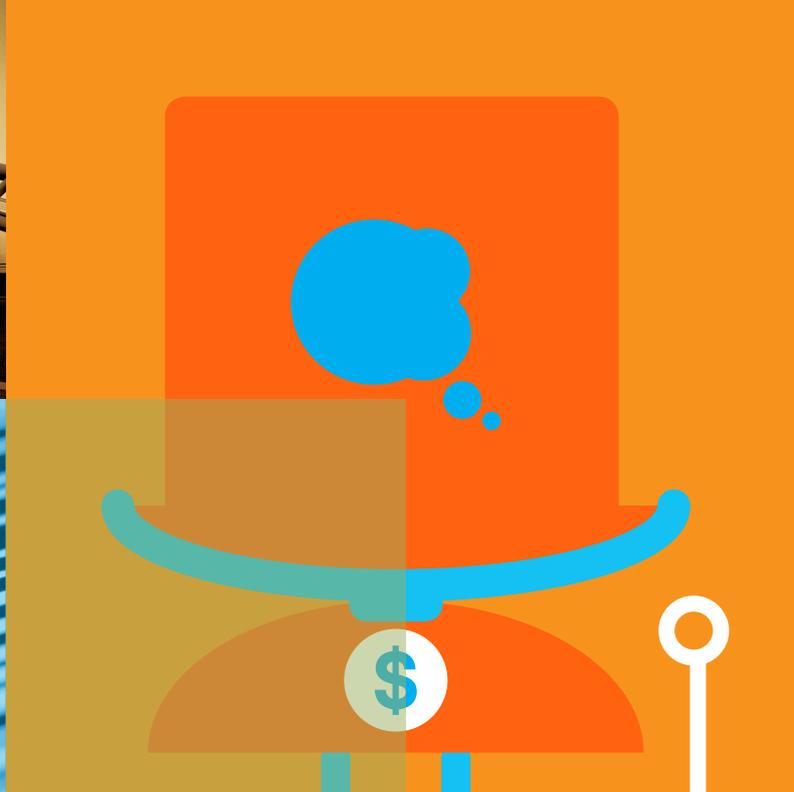

“The technological revolution accelerated globalisation, which in turn created a dynamically changing world that is increasingly challenging, competitive, complex and customised. With the speed of change today, a competitive advantage is short lived.

If a company is not planning ahead with its next innovation, it is already behind the curve. Supply chains need to be agile, flexible and responsive to provide the results companies need to achieve sustainable growth.”

# Smart supply chain solutions

Innovation sits at the heart of smart supply chain solutions. Solutions that exceed expectations and deliver on our promise. Thinking out the box, breaking down barriers and pushing boundaries is our way. We identify hidden problems by knowing what to look for and where to find them. We then transform the right possibilities into profitable opportunities.

## STRATEGY & CONSULTING

Equipping you with the big picture, we identify what's working, what isn't and what can be optimised for operational efficiency. Using a variety of tools and methodologies, including sophisticated modelling and scenario planning, we apply our analytical skills to uncover potential complications and profitable prospects.

## INVENTORY

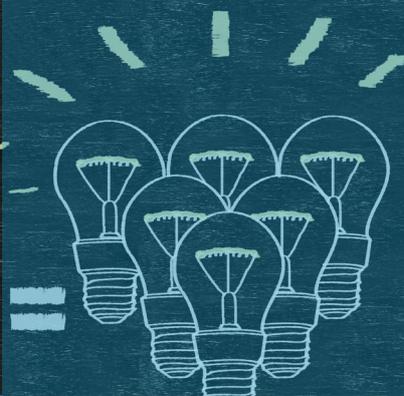

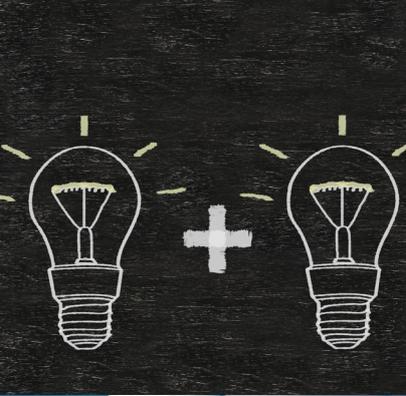

Inventory sits at the heart of any supply chain strategy. Too little or too much has a far-reaching implication for your business. Our inventory management software and core methodologies have been implemented in more than 30 countries, successfully reducing inventories by up to 40% while improving service levels and stock availability by 10% to 15%.

## WAREHOUSING & DISTRIBUTION

We design, implement, manage and operate Warehousing and Distribution solutions that are tailored to deliver bottom line benefits. Big or small, streamlined seamless solutions are our ultimate goal. Designed for today but with the future in mind, our customised solutions include cross-docking, racking, shelving, pick-and-pack, and track and trace capabilities.

## SOFTWARE SOLUTIONS

For 20 years, we have been modelling global supply chains, optimising inventory and network strategies, sustaining inventory and demand management processes and facilitating rapid response to changes in global supply and demand. Our suite of world-class software products and proven methodologies has helped us construct and interpret results successfully for clients across many business sectors around the world.

### TRANSPORT MANAGEMENT SERVICES

Our managed transport solution not only reduces costs and risk but increases supply chain integration, service levels, visibility and flexibility. Geared to optimise distribution networks, we have a proven track-record of reducing transportation costs by 15-20%. By combining route optimisation, supplier procurement, transport expertise and business intelligence with dedicated management processes, we transform your network into a competitive advantage.

### ROAD TRANSPORT SOLUTIONS

With an exemplary track record in operating large complex fleets, Barloworld Transport Solutions has the size, strength and expertise to deliver flexible, optimised and sustainable transport solutions. Solutions that range from general and bulk freight (contracted and line haul) to specialised transportation of oil, gas, chemicals, timber and abnormal loads. Service excellence, innovation, advanced fleet management capabilities and international standards of safety, governance and risk management are what set us apart.

### FREIGHT FORWARDING

Represented in more than 300 offices in over 100 countries, from the Far East, through the Middle East, into Europe and Africa, we have a comprehensive understanding of local and international markets, customs requirements and excise laws.

Solutions underpinned by international standards of safety, governance and risk management.

### SUPPLY CHAIN MANAGEMENT

Re-engineering and integrating logistics processes account for over 70% of potential savings and service enhancements in a supply chain. By creating supply chains that are dynamic, adaptable, responsive and visible, we develop performance based supply chains that drive costs down and service and profits up.

### ENVIRONMENTAL SUSTAINABILITY

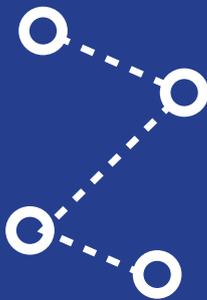

In smart partnership with re-, an environmental solutions company, we are able to offer our clients a more sustainable supply chain solution by integrating, optimising, measuring and reporting on major environmental aspects across their businesses. Committed to developing sustainable environmental solutions that deliver a return on environment for both business and the planet, re- has been in the waste management industry since 1988 and currently employs over 600 people.

# The future of smart supply chain solutions

Adaptable. Flexible. Responsive.

Serial innovation is built on the principles of engagement, continuous improvement and operational excellence across all business units.

Smart partnerships with key players across the supply chain drive innovation and increase intelligence, capabilities and resources.

Sustainable advantages created through serial innovation and smart partnerships enable businesses to adapt quickly to changing market trends.
